Interview Tips and Techniques

- Sujith Nair
- Cloud Data Architect
- Snowflake Snowpro Certified

- **# How to improve interviewer's confidence in you ?**

- **Overexplain** if you can do so, it shows knowledge and skill.
- Reference your answers with **work done on the project.**
- Reference what you have read in the **documentation**
- Offer solutions to their existing **problems**

• # How to handle questions you don't know ?

- Understand that it is normal to encounter a few questions that you don't know
- **Technique 1:** Get more time by repeating the question to them and confirm that the question is accurate.
- **Technique 2:** If you are not able to answer the question, answer a related question which will show you have some knowledge in the area.
- **Technique 3:** If you are not able to use the above 2 methods, the best way to let them know you don't know is to say you did not encounter this scenario in your projects and enquire about where the client is using the feature and tell them you are a curious person and can learn this feature quickly.

The image features a central white circle containing the text "Thank You" in a black cursive font. The corners of the image are decorated with floral arrangements. The top-left and bottom-right corners have clusters of flowers in shades of orange, white, and brown, with green leaves. The bottom-left corner has a similar floral arrangement with white, orange, and brown flowers and green foliage.

Thank You
