SUMMARY

Results-driven Business Analyst with over 3 years of experience in regulatory operations, business process analysis, and compliance within the financial services industry. Specialized in leveraging SQL, process documentation, and functional testing to ensure data integrity and accurate regulatory reporting. Seeking to apply my expertise in business analysis and regulatory operations to contribute to dynamic and innovative projects at BlackRock.

WORK EXPERIENCE

Business Analyst at Avant LLC, Chicago:

(Aug 2021 –Present)

- Conducted comprehensive analysis of business processes and data, ensuring regulatory applications were aligned with legal guidelines.
- Designed and implemented oversight processes to evaluate regulatory reporting accuracy, resulting in a 30% improvement in compliance accuracy.
- Documented detailed business and technology requirements, collaborating with cross-functional teams to achieve consensus.
- Built data pipelines using Airflow and Snowflake to ingest, process, and load data into in-memory databases, ensuring real-time data availability for bidding processes.
- Implemented Apache Airflow for workflow orchestration, resulting in a 30% increase in pipeline reliability.
- Utilized Azure Databricks and Spark for large-scale data processing, building and optimizing Spark-based data pipelines, and implementing machine learning models for predictive analytics.
- Built data quality systems using best-in-class techniques and technologies, enhancing data reliability and enabling teams to deliver more business value.
- Developed Tableau dashboards for marketing attribution, contributing to a 4% increase in application rates. Extracted insights from marketing data to create source attribution funnel dashboard in Looker, helping business stakeholders to improve customers' application experience.
- Collaborated with cross-functional teams to implement data quality checks using SODA, further utilizing AWS services including Redshift and S3 for large-scale data processing and storage.

Business Analyst Intern at CNH Industrial Inc., Racine:

(Mar 2021 – Aug 2021)

- Designed and implemented efficient ETL processes using Microsoft Access, optimizing SQL queries, collaborating with cross-functional teams, automating reporting systems, and conducting performance tuning, resulting in enhanced data management and accessibility.
- Collaborated with data scientists to define data requirements, implemented ETL processes for seamless data integration, optimized SQL queries, and facilitated the development of predictive models, fostering a synergistic environment for data-driven insights.

Business Analyst at Daten Solutions Inc., Chicago:

(May 2020 – Mar 2021)

- Developed and automated data migration pipeline from SQL Server to Snowflake using SnowSQL and SnowPipe, and further enhanced data quality by performing dimensional modeling on the migrated data.
- Developed and maintained data pipelines using Azure services resulting in a 40% increase in data processing speed.
- Automated ETL processes using Prefect (Python), enhancing data wrangling capabilities and achieving a 40% reduction in time through large-scale data conversions. Facilitated the seamless transfer of BAAN data into standardized formats for integration into Snowflake.
- Implemented engineering best practices to deploy and maintain quality datasets using Airflow, enabling efficient data processing and management.
- Created Tableau dashboards to explain variation in success Metrics and Time Series Analysis to higher management.
- Automated reporting process using Excel VBA (Macros) and MySQL maintaining accuracy and saving ~ 75% of time, maintained version control Git, Mercurial, SVN.

Business Analyst – Practicum Student at Labelmaster, Chicago:

(May 2020 – Dec 2020)

- Involved in designing databases, data marts, E-R model for OLTP and multi-dimensional model for OLAP using SnowSQL.
- Minimize technical debt in managing new data requirements, ensuring scalability and sustainability of data solutions, resulting in a 20% reduction in maintenance time within six months.
- Automated hourly status report saving 10 man-hours/week, thus decreasing response time for fixes and campaign failures.

Big Data Developer at Cartesian Consulting, Mumbai:

(Apr 2018- Jul 2019)

- Designed and implemented ETL processes using DynamoDB, resulting in a 50% reduction in processing time.
- Developed dimensional data models and a MariaDB-powered data warehouse, supporting the creation of a campaign data-mart and a comprehensive customer one-view for marketing campaigns.
- Developed data ingestion frameworks to integrate data from various sources, improving data availability for analytics.
- Implemented data transformation and aggregation processes, enabling more efficient reporting and analysis.
- Collaborated with business stakeholders to understand data requirements and deliver solutions that met their needs.

EDUCATION

- **MS in Computer Science and Mathematics**, Illinois Institute of Technology, **GPA: 3.8**

(Aug 2019 - May2021)

Related Courses: Big Data Technologies, Applied Statistics, Database Management, Data Preparation and Analysis.

- **MS in Statistics**, NMIMS University, **GPA: 3.35**

(Jul 2016 - Apr 2018)

- Certifications: [Snowflake Pro Certification](#), Databricks Certified Associate Data Engineer

SKILLS

- **Programming:** Python, SQL, Scala, Java, HTML, Excel VBA (Macros).
- **Big Data Ecosystem:** Spark, Hadoop, MapReduce, Hive, Pig, Kafka, Flume, Hbase, Microsoft Azure.
- **Distributed Data/Computing Tools:** MapReduce, Hive, Spark
- **Cloud Technologies:** Azure Data Factory, Azure Blob, NoSQL, Cassandra, MongoDB, Kubernetes, Snowflake, CircleCI, Airflow, Prefect, Google Data Studio, Azure Synapse Analytics, DynamoDB.
