## **EDUCATION**

MASTER OF DATA SCIENCE
ILLINOIS INSTITUTE OF TECHNOLOGY
08/2019 - Present
Chicago, USA

• GPA: 3.71

MASTER OF STATISTICS NMIMS 07/2016 - 04/2018 Mumbai, India

• GPA: 3.35

## SKILLS

**Data Science | Analytics**: Linear Regression, Multiple Linear Regression, Logistic Regression, Naïve-Bayes, KNN, Time Series Analysis, AdaBoost, Ensemble Classifier, K- Nearest Neighbor, K-Means Clustering, Hierarchical Clustering, SAS Enterprise Miner, SAS Enterprise Guide, SPSS

**Linear Algebra | Statistics**: Z-test, ANOVA, Chisquare test

**Programming Languages**: Python, R, Spark, Hive, Pig

**Deep Learning:** Convolution Neural Network, Recurrent Neural Network, Long Short-Term Memory Network

**Database:** SQL Server, Snowflake, PostgreSQL, MSSQL, MYSQL, Microsoft SQL Server, Microsoft Visual Studio

**Tools:** Tableau, Power Bl, Pentaho, MapReduce, Visual Studio, Prefect, SSIS, SSRS, SSAS, SharePoint, JIRA, Mode

**Cloud:** AWS Lambda, AWS S3, AWS EC2, AWS CLI, Kafka, Redshift, AWS Sage Maker

**Certifications:** SAS Certified Base Programmer for SAS 9 in Mar 2017, SAS Certified Predictive Modeler Using SAS Enterprise Miner 14 in Apr 2018, Practical Machine Learning in Dec 2018 from John Hopkins University, Machine Learning Specialization in Feb 2019 from University of Washington, Snowflake Pro Certification September 2020

## **WORK HISTORY**

### DATA ENGINEER INTERN

Daten Solutions Inc.

05/2020 - Present

Developed data migration pipeline from relational databases like SQL Server to Snowflake, and further performed dimensional modeling on the migrated data

Chicago, USA

Mumbai, INDIA

Mumbai, INDIA

 Automated ETL processes using Prefect (Python), making it easier to wrangle data and reducing the time by as much as 40% by performing large-scale data conversions, and transferring BAAN data into standardized formats, for integration into Snowflake

### **BUSINESS ANALYST**

Cartesian Consulting Inc.

04/2018 - 07/2019

- Determined the trend for improving customer retention and reducing churn rate using logistic regression, and represented it by creating a dashboard in MS Excel, this led to a two-fold improvement in the campaign response
- Executed predictive analytics by creating customer one view, customer profiling, customer segmentation after extracting data from PostgreSQL, and translated this analysis into business terms and actionable guidance
- Identified the 'Most Valuable Customer' by deploying Random Forest algorithm with optimization, and design of experiments to achieve a true positive rate of 81%, this led to better customer targeting and improvement in yearly top-line revenue by 13 %
- Executed ad-hoc analysis, market basket analysis, along with the creation of various business trend reports & trackers to analyze patterns & movements in business KPIs for marketing departments of top retail and apparel brands in India

#### STRATEGY AND ANALYTICS INTERN

Greeksoft Technologies Pvt. Ltd.

09/2017 - 12/2017

Led a price forecasting project by forming a hypothesis, performing information gathering, and developing a technical analysis of the stock data

- Built an RNN Neural Network model for Live positional trading using Keras package
  in python where outputs supplemented Bull Spread Strategy in Options Trading, the
  developed model architecture was backtested for the period from the year 2012 to
  the year 2017 where it achieved correct market prediction for 71 % of the days; this
  forecasting architecture is utilized for live trading
- Build and maintain an archive of key research findings, and develop benchmarking capabilities and innovative new ways of telling interesting data stories

### ASSOCIATE RELATIONSHIP MANAGER

Tata Capital Financial Services Ltd. 07/2015 - 07/2016

15 – 07/2016 Mumbai, INDIA

- Drove acquisition channel using a data-driven approach for used-car and twowheeler dealerships, by building customer scorecard after analyzing different parameters affecting the repaying capacity
- Developed interactive dashboards using MS Excel and Tableau, indicating crucial metrics to drive key business decisions and communicate key concepts to readers
- Led a team of 3 to construct customer risk assessment by developing, automating, and analyzing financial reports and client credit history, which led to a multi-fold increase in corporate lending for the two-wheeler and used cars segment, with 0% NPA cases reported over 10 months

### **PROJECTS**

- Stack Overflow Data Analysis (October 2019 December 2019) Analyzed insights about questions posted on stack overflow by extracting data using Google's big query data warehouse; discovered top spammers, expert users, and most valuable customers users by leveraging big data technologies such as Apache Hive, Apache Pig and Apache Sparks (git link)
- Recommendation System using Yelp (January 2020 March 2020) Built a
  personalized restaurant recommender web app using the Yelp dataset of restaurants
  by testing models like Pure Collaborative, Approximate Nearest Neighbour, K-NN,
  Naive Bayes and Hybrid Matrix Factorization on different hyperparameters which
  were tuned using the python library scikit optimizer (git link)
- Image Mating using CelebAMask-HQ (June 2019 July 2019) Conducted Image
  Matting using the U-Net architecture of the Convoluted Neural Networks on the
  open-source Celeb-Mask dataset with an IOU Score of 92% (git link)
- Inventory Optimization problem on Kaggle (January 2019 February 2019) Forecasted the demand for LED televisions using Holt-Winter's Smoothing method with MAPE of 20.760 (git link)
